

# 17-18 November in Feldkirch

## Open House at Forstner

We look forward to welcoming you to Feldkirch on this occasion!

We will be presenting our new products,  
the nuSLIT and the SLIT CUT slitting and cut-to-length line.

**Forstner nuSLIT** – The Forstner nuSLIT is the machine every modern sheet metal workshop dreams of. With the nuSLIT module cut-to-length line you just set the slitting width, length and quantity on the control panel and press start. The machine then straightens your material and your sheets are ejected with amazing precision, with no stop marks and ready for the next step in production.

**Type:** Slitting and cut-to-length line  
**Coil width:** 1250 mm  
**Capacity:** 1.0 mm

**Forstner SLIT CUT** – The new Forstner SLIT Series is an outstanding redesign, now with even more stability, flexibility and user-friendly innovations. With the easy-to-use control system you can set lengths and quantities faster than ever. Sheets are simply fed into the machine and the slitting knives are controlled from the screen, all for easy handling with no waste.

**Type:** Slitting and cut-to-length line  
**Coil width:** 1250 / 1500 mm  
**Capacity:** 1.25 / 1.0 mm

### The most important advantages:

- ✓ All orders are handled automatically
- ✓ Maximum flexibility for order handling
- ✓ No risk of human error
- ✓ Optimal material utilization
- ✓ Extensive time savings
- ✓ Total control

### The most important advantages:

- ✓ Attractive, stable and compact design
- ✓ Integrated rotary (SLIT CUT) or guillotine shear (SLIT PRO)
- ✓ Built-in LED-lighting for easy slitting knives adjustment
- ✓ Can be operated from either side of the machine for greater user-friendliness
- ✓ Fastest sheet width setting on the market

**CIDAN**  
MACHINERY GROUP

CIDAN Machinery Group markets and manufactures CIDAN, Götteneds, Forstner and nuIT

CIDAN Machinery Austria GmbH • Studa 9 • 6800 Feldkirch/Austria • Tel: +43 5522 74309-22 • sales@forstnercoil.at • www.cidanmachinery.com

# Be there!

We also present the unbeatable combination if you want to win the long jobs - the 4m Rapido 41 and F41 machines with a rotary shear.

**CIDAN RAPIDO 41** – The CIDAN RAPIDO 41 is a robustly built guillotine shear that cuts all thicknesses - with no settings at all. The electric gear motor has impressive power, uses very little energy and has low noise output for a safe and comfortable working environment. At 35 cuts per minute RAPIDO maintains an outstanding speed.

**Type:** Shear  
**Length:** 4100 mm  
**Capacity:** 1.5 mm

## The most important advantages:

- ✓ Easy to use
- ✓ Extremely powerful gear motor
- ✓ Fast, 35 strokes per minute
- ✓ Clean and accurate cutting
- ✓ Low noise for good working environment
- ✓ Pneumatic hold-down beam as standard

**CIDAN F41** – The CIDAN F41 is powerful, almost indestructible and folds with precision and accuracy. With fully welded sides and robust upper and lower beams, this machine is optimized for highest stability, low maintenance costs and problem-free running, year in and year out. Both the bending beam and the upper beam have dual drives.

**Type:** Folding machine  
**Length:** 4100 mm  
**Capacity:** 1.25 mm

## The most important advantages:

- ✓ Fast, powerful and user-friendly
- ✓ Very tight hemming
- ✓ Two 2-metre profiles folded simultaneously
- ✓ Rotary shear option for upper beam

Food and drink will be provided!
