

29-30 September in St. Pölten
Open House at nuIT

We look forward to welcoming you to St. Pölten on this occasion!

We will be presenting our new products,
the FX PLUS folding machine and the SLIT CUT slitting and cut-to-length line.

CIDAN FX PLUS – The CIDAN FX Plus folding machine is strong, exact and almost impossible to wear out. With welded sides, clamping beam with eccentric drive and extra strong lower beam, this machine is designed for the highest productivity levels, low maintenance costs and problem-free operating, year in and year out.

Type: Folding machine

Lengths: 2600 / 3200 / 4100 mm

Capacity: 2.5 / 2 mm

The most important advantages:

- ✓ Extremely short set-up times with combibeam
- ✓ Set exact sheet thickness fast, directly in ProLink
- ✓ Perfect bending radius for all material thicknesses
- ✓ No risk of cracking or paint damage
- ✓ Lower machine load

Forstner SLIT CUT – The new Forstner SLIT Series is an outstanding redesign, now with even more stability, flexibility and user-friendly innovations. With the easy-to-use control system you can set lengths and quantities faster than ever. Sheets are simply fed into the machine and the slitting knives are controlled from the screen, all for easy handling with no waste.

Type: Slitting and cut-to-length line

Coil width: 1250 / 1500 mm

Capacity: 1.25 / 1.0 mm

The most important advantages:

- ✓ Attractive, stable and compact design
- ✓ Integrated rotary (SLIT CUT) or guillotine shear (SLIT PRO)
- ✓ Built-in LED-lighting for easy slitting knives adjustment
- ✓ Can be operated from either side of the machine for greater user-friendliness
- ✓ Fastest sheet width setting on the market

CIDAN
MACHINERY GROUP

CIDAN Machinery Group markets and manufactures **CIDAN, Göteneads, Forstner** and **nuIT**

CIDAN Machinery Austria GmbH • Studa 9 • 6800 Feldkirch/Austria • Tel: +43 5522 74309-22 • sales@forstnercoil.at • www.cidanmachinery.com

Be there!

We will also present the networked operation of the nuIT software in combination with a The BASE (Bending And Slitting Engine) system and show the nuSLIT slitting and cut-to-length line.

The BASE – The BASE (Bending And Slitting Engine) is the world's first fully automatic and highly flexible production line for the fully integrated manufacture of profiles and molding. It consists of a combination of the best sheet metal working machines on the market (Forstner, CIDAN and Thalmann). The control of this machine by nuIT's revolutionary software ensures increased production efficiency in a way never seen before!

The most important advantages:

- ✓ Fully automated Production line
- ✓ Real time Cutting optimization
- ✓ Operation with just a single person
- ✓ Automated Labeling
- ✓ Semi-automatic mode for manual settings possible
- ✓ Integration in all company processes

Forstner nuSLIT – The Forstner nuSLIT is the machine every modern sheet metal workshop dreams of. With the nuSLIT module cut-to-length line you just set the slitting width, length and quantity on the control panel and press start. The machine then straightens your material and your sheets are ejected with amazing precision, with no stop marks and ready for the next step in production.

The most important advantages:

- ✓ All orders are handled automatically
- ✓ Maximum flexibility for order handling
- ✓ No risk of human error
- ✓ Optimal material utilization
- ✓ Extensive time savings
- ✓ Total control

Type: Slitting and cut-to-length line

Coil width: 1250 mm

Capacity: 1.0 mm

Food and drink will be provided!
