

Land your orders with speed, care and smartness.

RAPIDO 32 SSM (Stacking Sensitive Material) is the newly developed cut n' stack system from CIDAN machinery that speeds up your guillotine shear and never leaves you with scratches or dog-ears. Set

backgauge measurements and number of cuts. The sheet support is pulled back fast as lightning and the cut material falls gently down onto the moveable material wagon where the sheets are stacked at a speed of up to 35 panels per minute.

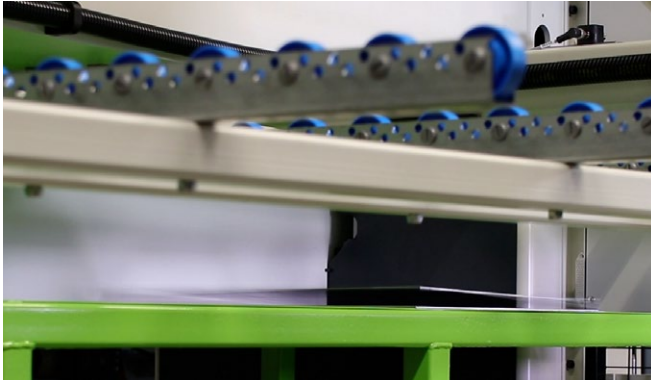

The material wagon can be loaded with up to 700kg. If you cut widths of up to 410mm you can stack to a height of 90mm, with widths greater than 410 mm, to a height of 40 mm.

In combination with the CutLink control system you have a real cutting and stacking giant that can be programmed for ten different backgauge settings in the desired quantities, all with neat stacking on the material wagon.

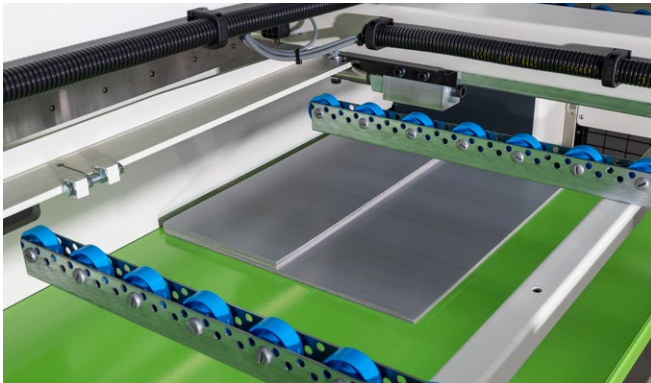

There is no smarter, gentler or more efficient backgauge system for high volumes.

The most important advantages:

- ✓ No scratches
- ✓ No dog-eared corners
- ✓ No customer complaints or recalls
- ✓ Fast, sensitive and structured stacking
- ✓ Extra suitable for sensitive materials
- ✓ Excellent ergonomics with no lifting

When the sheet support is pulled back, the sheets fall straight down for soft landing on the material wagon, with no risk of damage.

With RAPIDO SSM there is no heavy lifting. Your cut material is neatly stacked on the material wagon, ready for transfer to the next machine keeping panels at suitable working height.

Cutting speed

0–100 mm:	35 cuts/min
125 mm:	24 cuts/min
750 mm:	15 cuts/min

Back gauge

Length	750 mm or 1000 mm
Drive system:	Two ball screws with Ø25 mm two shaft with Ø30 mm
Speed:	150 mm/seconds
Tolerance:	+/- 0.1 mm
